SUMMARY OF QUALIFICATION

Full-Stack Developer with 2+ years of experience in designing, developing, and deploying scalable web applications. Skilled in front-end technologies like React.js, HTML, CSS, and JavaScript, and back-end development with Python, Django, and RESTful APIs. Proficient in integrating third-party APIs, optimizing performance, and managing PostgreSQL databases. Familiar with Agile workflows, Git version control, and cloud deployment using AWS. Adept at collaborating with cross-functional teams to deliver secure, high-performance applications aligned with business objectives and user expectations.

SKILLS

- Python
- Django
- React.JS
- PostgreSQL
- HTML & CSS
- REST Framework
- Javascript
- Firebase
- GIT
- ORM
- Figma
- MYSQL
- UI Prototyping
- OOPS
- Tailwind CSS
- MongoDB

EXPERIENCE

Full Stack Web Developer   United Arab Emirates | 2025
Freelance

Delivered a custom business web application for companies using **React.js**, **HTML**, **CSS**, **Bootstrap**, **AJAX**, and other modern frontend libraries. Collaborated closely with the client to design a tailored solution aligned with brand identity and functional requirements. Delivered a **user-centric, SEO-friendly**, and high-performance platform that significantly improved digital visibility, organic traffic 40%, and user engagement.

- Engineered a responsive and accessible UI using React.js, **Tailwind CSS**, and modular components, improving cross-device consistency and user experience by 50%.
- Integrated **third-party APIs** for analytics, email notifications, and customer feedback collection, increasing automation and reducing client follow-up time by over 30%.
- Hosted on **Vercel** and **AWS** with CI/CD pipelines, custom domain routing, and HTTPS support, ensuring 99.9% uptime and scalable infrastructure.
- Collaborated with stakeholders to convert business requirements into technical solutions, delivered timely iterations, and optimized features post-launch based on user feedback and behavior.

Associate Software Engineer-Python Developer   Coimbatore, India | 2024
Pepil Consultancy Services

Contributed to the development of a scalable professional networking platform for cinema professionals and artists. Focused on backend systems, API development, and performance optimization to ensure secure, efficient operations. Designed database models, integrated third-party APIs and cloud services, and supported junior developers through code reviews and technical guidance.

- Build and maintained robust **RESTful APIs** using **Django REST Framework**, implementing features such as authentication, user profiles, messaging, and notifications to support platform functionality.
- Integrated **MSG91** for secure OTP-based authentication and implemented cloud storage using **Backblaze** and **Utho**, enabling scalable file management and enhancing system security.
- Enhanced backend performance by optimizing database queries, applying **PostgreSQL indexing**, and implementing caching strategies, resulting in over a 35% improvement in API response times.
- Worked in an Agile development environment, worked closely with frontend teams using **Java/Kotlin**, authored API documentation, and participated in **sprint planning** and **code reviews,** resulting in a 20% improvement in development efficiency and cross-team collaboration

Python Full-Stack Developer (Django + React)   Kochi, India | 2023
BROTOTYPE

Engaged in real-world project development as part of an immersive full-stack engineering program focused on real-world, production-grade projects. Specialized in delivering scalable, secure web applications while working with modern frontend and backend technologies in a collaborative, performance-oriented environment.

- Built and deployed full-stack applications including an **e-commerce platform** and a **travel booking system** using **React.js**, **Django**, and **RESTful APIs**, with features like JWT/OAuth authentication, dynamic product listings, and payment gateway integration.
- Transformed Figma screens into adaptive, user-friendly interface components using **HTML**, **CSS**, **Bootstrap**, and **AJAX**, ensuring a seamless experience across mobile and desktop platforms and contributing to a 30% reduction in bounce rate.
- Designed and managed **PostgreSQL** databases with efficient relational schemas, applied Django **ORM** best practices, and optimized complex queries to support high-traffic and data-heavy functionalities.
- Launched projects on **AWS (EC2,Amplify,Route 53)** using **NGINX** and **Gunicorn**, configured CI/CD pipelines, and maintained codebase integrity using **Git** and **GitHub** for clean collaboration and version control.
- Contributed to peer development by assisting fellow developers with **debugging**, **testing**, and troubleshooting; participated in weekly project reviews and code walkthroughs led by experienced professionals, receiving actionable feedback and offering suggestions to improve code quality and architecture.
